- Self drying spray or gel.
- Forms an ultra thin nearly invisible silicone membrane bonded to the stratum corneum.
- Waterproof, gas-permeable membrane that acts like an extra layer of skin.
- Helps to soften, flatten and smooth the scar while maintaining the moisture balance and elasticity of the adjacent skin.
- Reduces the discolouration and itching associated with scars.
- Flexible, can be worn with sunscreen and even makeup.
- Can even be used with sporting activities, including swimming.
- Can be used on moving limbs, even on the lips.
- Supporting its efficacy, Kelo-Cote® has published trial data involving over 1800 patients.
